Art Unit: 1724

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 33 is rejected under 35 U.S.C. 102(b) as being anticipated by the McNeill et al. publication entitled "Arsenic Removal During Precipitative Softening" (i.e. reference "BF" of the IDS submitted March 26, 2004). The reference discloses forming magnesium hydroxide in water to adsorb arsenic from this water (see page 456, right column, last full paragraph, first sentence). This reference further teaches adding a compound (i.e. lime; see page 454, left column, last full paragraph, line 9) which causes precipitation of calcium carbonate in this water (see page 453, right column, second full paragraph, lines 3-4); and this is all that is required by claim 33.

Claims 2-30, 32, 34-37, 39-43, 46-54 and 56-65 are allowed.

Applicant's arguments, with respect to claim 33, filed December 6, 2005 have been noted and carefully considered, but no longer appear to be relevant in view of the new grounds of rejection.
